SUMMARY

6+ years of experience as Full Stack Software Developer having hands-on experience in web, software development and AWS services. Proven expertise in software requirement gathering, analysis, development, testing, and maintaining enterprise-level applications. Dedicated to continuous learning and growth, with a passion for adopting new technologies and staying ahead in the ever-evolving tech landscape.

TECHNICAL SKILLS

Programming Languages/Frameworks	Java, Python, Spring Boot, Spring Cloud, Hibernate, Spring Data JPA, Angular, ReactJs, RxJs, JavaScript, TypeScript
Cloud Computing	AWS Lambda, API Gateway, CloudFront, Route 53, ECS, EC2, ECR, Fargate, ELB, IAM, S3, Step Functions, DynamoDB, RDS, CloudWatch, Terraform
Containerization / Orchestration	Docker, Kubernetes, CI/CD, GitHub Actions
Software Development Practices	Microservices, RESTful web services, GraphQL, SDLC, Agile Scrum
Databases	MySQL, SQL, PostgreSQL, PL/SQL, MongoDB
Testing Frameworks	TDD, BDD, Junit, JaCoCo, Mockito, Jasmine, Karma

EMPLOYMENT

Senior Software Developer

Cyient Ltd.

December 2021 - Present

Project [3] – John Deere Traktis

Project Description: Developed the tyre configuration web application and provided seamless development and integration, supporting the smooth operation for tyre configuration w.r.t tractors model, gearbox and load which enhanced overall customer satisfaction.

Role: Senior Software Developer

Responsibilities Involved:

- Led a team of four members in developing the application for the John Deere Traktis project.
- Migration of angular version 13.x to latest 18.x involving breaking changes to utilize standalone architecture and lazy loaded components enhanced app performance
- Designed and optimized database schema, managing table relationships to ensure efficient operations.
- Implemented Infrastructure as Code (IaC) using Terraform for additional non-prod environment
- Reduced app deployment time by almost 40% by integrating a CI/CD pipeline GitHub Actions.
- Assisted in configuring rules and build automation for code with vulnerability scanning and software composition analysis using tools like SonarQube, Checkmarx, Jerboa, and Mend.
- Reduced cloud costs by creating a GitHub action job to shut down the RDS in the non-prod environment during non-working hours, saving around \$400 annually.

Skills Used: Angular, Python, Java, Spring Boot, Terraform, AWS- Lambda, Gateway, RDS, S3

Project [2] – UKPN

Project Description: UK Power Network is Management and Planning of Power supply & its Outages, Voltages, Faults, etc. which allows the org. to manage time and efforts, leading to a better solution & utilization of power resources. Delivered all phases of the application development before time.

Role: Software Developer

Responsibilities Involved:

- Contributed in a scalable and resilient backend architecture using Spring Boot, adhering to micro services principles for seamless integration and performance.
- Implemented front-end development by building responsive, user-friendly interfaces and dynamic web applications using Angular and Angular Material.
- Developed a complex global filter for data tables in the Power Outage module, enhancing user experience and usability while reducing manual efforts by approximately 20%.
- Ensured high code quality and reliability with comprehensive unit testing using JUnit and Mockito for Spring Boot and end-to-end testing using Jasmine and Karma for the Angular.
- Documented RESTful APIs with Swagger for enhanced usability and leveraged Postman to perform detailed API testing and validation.

Skills Used: Angular, Spring Boot, Hibernate, Microservices, SQL, Azure, Angular Material

Project [1] – PWCS and PWC-Spark

Project Description: Dealing with different aerospace components, machines require through inspection and repair of it. PWCS Application provides and makes the manual process of scheduling the repair work and its management easy.

Role: Software Developer

Responsibilities Involved:

- Solely contributed to over 40% of the app development from scratch, including end-to-end API integration in the Angular application.
- Translated UX designs into fully functional Angular components and modules.
- Designed and developed foundational reusable components and templates, accelerating development and enhancing code consistency.
- Enhanced application reliability by contributing to robust test coverage using Jasmine and Karma frameworks.

Skills Used: Angular, RxJs, Angular Material, Jasmine and Karma

Software Engineer

Zensar Technologies Ltd.

September 2019 – Nov 2021

Project [1] - Crosswork application

Project Description: Cisco's Single Page Application that lets the Customer purchase the network subscription plans according to various regions of the world. Tariff plans and Taxes calculation with

respect to different locations.

Role: Software Engineer

Responsibilities Involved:

- Creating dynamic Product catalogue page having dynamic pricing based on tenure.
- Actively participated in requirement gathering from the project's inception and accordingly documented specifications to ensure clarity and alignment.
- Successfully Integrated the API from Angular Services
- Cross browser compatibility and Conducting Usability Testing to resolve interface problems.
- Contributing in development of pages for Login, session maintenance, Dashboard

Skills Used: Angular, RxJs, Javascript, Html, ngBootstrap

Software Support Engineer

Amdocs DVCI Ltd.

September 2018- March 2019

Project [1] – Rogers

Project Description: Being in Telecommunication domain, Rogers and AT&T provides different network Processing, Authorization and Activation in Canada. Involved in order provisioning and fulfilment.

- Worked in the Amdocs Order Management System product in responsible resolve the recurring and unsolved stuck orders, was responsible to maintain and manage the Software products like CRM, SOM.
- Detail-oriented and Real-time bugs handling in the Telecom domain of Rogers and AT&T.

EDUCATION

Dr. D.Y. Patil Institute of

Pune, India

Technology

July 2014 - May 2018

- B.E. in Computer Engineering - Acquired 73 % as First Class with Distinction.

ACHIEVEMENTS

- Received Excellence Award in Zensar Technologies Ltd, given for extraordinary performance in a quarter.
- Finalist, Inaugural Smart India Hackathon, 2017 AICTE off about 5 lakh students that appeared.
- PDCA (Pune District Cricket Association) - 2013, 2017, U-23 2019, MCA Qualifier – 2022.
- Received the Most Valuable Player (MVP), Most Valuable Team – Bronze 2024 award at Cyient for outstanding contributions to the Traktis project.
